Vo-Tech Reflection

I think that the Vo-Tech trip was interesting. It was cool that you got to go around to most of the shops and see what the school offers. One thing I wish was different is we would have more time at each station. Because when we would go to each station, it seemed like the person(s) had to rush through their explanation and didn't have enough time to finish it. That would also mean we didn't have enough time to get a full explanation of the shop. For example I wish they gave more information about the computer programming course, as that is the kind of stuff I am interested in.

It also would have been nice if we could choose which shops to look at and could stay at each one as long as we would want to. I know that there is an open house at another time, but I'm sure that not everyone is able to go to that. Overall, I think the trip was cool and has some benefits to it, but it was really rushed.
