

Unit 1 Lab

Skills #	Speaker(s)	Skill Name	Description	My Skill Level	A Way to Improve
1	Max Hawkins	Storytelling	He uses stories about his life to emphasize his points	7	I tend to drag my stories on at times. Simplifying them would help me improve on this skill.
2	Tom Griffiths	Comedy	He uses comedy to make the audience more engaged and attentive through his speech	6	I can be funny, but not all the time. Learning connections through comedy and my subject can help me improve on this.
3	Ari Wallach	References	He is good at making references to things, which help connect to what he is talking about. This makes it easier to understand what he is talking about.	8	I am pretty good at doing this, but I'm not perfect. Practicing it more will help me improve.
4	Yuval Noah Harari	Very Knowledgeable	He knows his stuff, which makes his speech better and assures the audience that he knows what he is talking about.	9	I usually always know the stuff I am talking about, and could always use room to improve. That's why I put a 9.
5	David Autor	Uses Lots of Statistics	He uses lots of stats, which help to draw a line between that and his content. This gives a clear picture of what he is talking about, and helps the audience to draw a picture of what he is saying.	6	I'm not the greatest with statistics. Learning more about them and becoming more familiar with them would help me improve.
