

## Unit 8 Activity 2

---

**1. Describe one thing that you did well in creating this presentation.**

I did well in making the presentation look well, in terms of theming. This makes it look good and eye-catching to the viewer. This makes them more engaged with it.

**2. Describe one thing that you would change in creating this presentation if you had to do it again.**

There is nothing I believe that I would change. I think it is good just the way that it is.

**3. How would you rate your time management skills, like prioritizing tasks, following schedules, and keeping goals in mind as you created this capstone project? (Hint: Some people use checklists or mobile apps to manage their time and tasks—did you)?**

I just did it straight through and knew what I had to do for each step. I tried not to make the process complex.

**4. Do you think your content would achieve its objectives if presented to marketing professionals in your company? Why or why not?**

I think it would. I believe this because it clearly states the information they are looking for, and it does a good job of doing so.

**5. Did the content sufficiently use multimedia, such as images, formatting, SmartArt, infographics, animations, and sound effects to be engaging? How can these be improved on in your next presentation?**

Yes. And like I always say, there's always room for improvement. I could make them look better, and theme them even better in future presentations.

**6. Was the design of your content befitting the message and purpose of your presentation? How could it be improved in your next presentation?**

Yes, it is. I can always improve it for every presentation. There's always room for improvement each time.

**7. Provide an overall assessment of your final capstone PowerPoint presentation. Were you satisfied with your presentation? Why or why not?**

I was satisfied with it, because it accomplished what it needed to do, and it was fun doing every component of the project throughout the units of this course.
